

IMPROVED SCHOOL & ATHLETIC PERFORMANCE and ALLERGIES

Our Son Camden wrote this one night when he was trying to figure out what to write for a 'free write' for his 5th grade class. Since he sleeps on the mini mat every night, and loves it, I suggested he write about it and with the brochure in front of him (as he wanted to have the correct facts) this is what he came up with in his own words...

In addition, we as his parents have noticed many amazing improvements in Camden's performance in all areas of his life ~ especially in regards to his homework and paying attention in school (which both had been significant issues in the past). ALL of his teachers have noticed a dramatic improvement in his ability to focus and pay attention in class. Even in hockey his alertness, speed and drive have improved. In addition, at his recent allergy appointment and yearly physical, since he is doing so well his Doctors asked 'what are you doing differently and are you taking any special vitamins?' The only thing that has changed over the past seven months is that Camden has slept on the Mini Mat every night...

If only it could be as simple as the power of a wonderful, peaceful, soothing good nights sleep on a Natural FDA approved product such as the Universal Biomat...

Others have noticed after only a minimum of 20 minutes on the Biomat:

- Improved relaxation and peace of mind
- Reduced cellulite
- Significantly unexplained increase in energy
- Muscle relaxation and soothed muscles

And more...

Thank you!!!

Maria and Craig Richards

... "I'm doing better in school. The BioMat helps me feel calm down and relaxed like at the beach. It also makes me concentrate"...

Universal Biomat

The bio mat

FreeWrite

My mom owns this thing called a bio mat. It's a mat filled with amethyst crystals. It has 17 layers and goes up to 158 degrees. It sends off far infrared rays and negative ions. Far infrared rays can remove toxins from your body. Toxins are chemicals that can come from air, food and drinks. Negative ions help the flow of oxygen to the brain which can make you pay attention more. My mom explains why I'm doing better in school. Back to when I said it was filled with amethyst crystals are crystals that can make you calm and focused. It looks like a clearish purple rock. Now that you know about the bio mat I will tell you how I feel after sleeping on it every night. It helps me feel calm and relaxed like I'm at the beach. It also makes me concentrate

at school and when my parents are talking to me. When I wake up in the morning I don't need to stretch as much. The bio mat is like a remote control to your body which is probably why I'm more into focusing. As if now I'm going to sleep on the bio mat so I hope you learned something about it.
