The Biomat® – a safer, holistic alternative

Approved by the FDA for arthritis pain relief!

DEEP PENETRATING HEAT

The Biomat® soothes arthritis pain by delivering warm infrared heat to the affected areas. The infrared rays penetrate deep into the body providing relief where no sports creams or patches can reach.

"I had been suffering from Osteoarthritis for 10 years. I strongly dislike taking medication and was willing to try anything to get rid of the pain. I immediately began to feel relief within the first week. . . .I am totally sold on the healing power of this wonderful product and am recommending it to others." -K. Allen

INCREASED MOBILITY

The Biomat®'s infrared therapy effectively reduces the pain and stiffness associated with arthritis. The Biomat® relaxes your body and increases mobility so you can take on the day.

"My work is exceedingly physical and I have had arthritis and mobility issues for decades. The Biomat® is one component in an overall strategy to stay healthy and mobile, and to be able to continue working for as long as possible. For the record, the Biomat® is my only pain treatment; I take no pain relievers of any kind, either over the counter or prescription, ever. Nowadays, I have little to no awareness that I have arthritis at all."

-Catherine

INCREASED CIRCULATION

The warmth of the Biomat® increases your blood circulation. This boost in blood flow brings oxygen and nutrients to injury sites, reducing inflammation and promoting the body's natural healing process.

"By my fourth [Biomat®] session, not only was I walking up the stairs easier, I was actually able to walk up a steep hill in my neighborhood! The Biomat® sessions really helped to reduce the pain and inflammation I was feeling so I have no problem recommending it to anyone with arthritic problems." -Alison
